Dr. Suzanne Bentz is board certified in Bariatric Medicine, which deals with the treatment of obesity and other related diseases. She and her caring and knowledgeable staff have a special interest in medical weight loss and believe bariatric specialists are most qualified to assist patients with losing weight. Dr. Bentz has helped thousands of patients lose unhealthy pounds and maintain a healthy weight. Many of her patients have lost over 100 lbs. and have successfully avoided gastric bypass surgery.

MEDICALLY SUPERVISED WEIGHT LOSS PROGRAM

At Red Mountain Med Spa, our primary focus is to help you lose weight, reverse the effects of aging, and create a healthier you! Our programs are personalized, because everyone is unique. Patients are guided through a customized weight loss program with the expertise of a caring physician and staff. At Red Mountain Med Spa we offer a variety of services that produce maximum weight loss results.

WEIGHT LOSS MEDICATIONS

One of the first steps in successful weight loss is controlling hunger, appetite and food cravings; therefore, a number of our clients are prescribed appetite suppressing medications. Dr. Bentz and her staff carefully evaluate each patient to determine the best approach and medication to help them achieve their weight loss goal. Price: \$199 to start, which includes exam, lab work, body composition analysis, low calorie diet plan and first month's medication. Refills for medications are \$95* per month.

**For a regular dosage. Should an increased dosage be required, there will be an additional fee of \$30.00.*

RED MOUNTAIN WEIGHT LOSS PROGRAM

Our most popular program utilizes a natural hormone that helps you burn stored excess fat, which creates rapid weight loss. It also targets the fat that tends to accumulate around the waist and stomach, allowing you to lose inches while you lose weight! People who have struggled with a slow metabolism, hormone imbalance, menopause, or even those last few annoying 10 pounds, are finally losing weight and they are losing it fast! At Red Mountain Weight loss we prescribe only pharmaceutical grade medications. We only offer patients a sublingual hormone, eliminating the need for inconvenient and painful shots. The hormone has virtually no side effects and, typically, between the hormone and the diet, our patients will lose an average of 12 to 20 pounds per month! *For optimal results, this program can be combined with the appetite suppressant program.* Price: The New Patient cost for this program is \$375, which includes your exam, lab work, body composition analysis, low calorie diet plan and first month's supply of medication. Monthly refills are \$285.

VITAMIN WEIGHT LOSS INJECTIONS

Called the "Weight Loss Shot," this safe and effective injection helps burn fat, increase energy and decrease hunger. Shots can safely be taken once or twice a week or as needed when your weight loss is at a standstill.

- Price: \$10 Single Dose
- Price: \$20 Double Dose
- Shot Card Special - \$100 – good for 12 single shots or 6 double shots.
